Summary

B.Tech Computer Science graduate with **6-month internship experience** in backend and full-stack development. Skilled in building scalable web applications, **REST APIs**, and secure systems using the **MERN stack, Python**. Experienced in database management, authentication/authorization, role-based dashboards, and payment integration.

Technical Skills

- **Programming Languages:** C, JavaScript, TypeScript, PHP, Python
- **Backend & APIs:** Node.js, Express.js, MongoDB, MySQL, PostgreSQL, REST API, Authentication/Authorization, RBAC
- **Frontend & UI:** React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Design
- **Tools & Platforms:** Git/GitHub, Postman, VS Code, Cloud Deployment (Vercel, Render)

Experience

Software Developer Intern | Tosscoll Pvt. Ltd. | Feb 2025 – Aug 2025 | India

- Developed three production web platforms (NGO Management System, Partner Portal, and Learning Management System**) used by 20+ users,** supporting **₹2L+ donation** processing and **15+ partner transactions.**
- Built secure **wallet** systems, payment integrations, **RBAC-based dashboards**, reporting modules, and **automated attendance monitoring,** improving operational transparency and **reducing manual reporting by 15-20%.**
- Implemented course management, online examinations, student enrollment flows, and partner transaction tracking, streamlining onboarding and training operations across **10+ training centres.**
- Conducted system-wide debugging, testing, and performance optimization, improving application **performance by 15%.**

Technologies: PHP, MySQL, HTML5, Tailwind CSS, JavaScript

Projects

Face Recognition Attendance System –

- Built an **AI-based attendance system using OpenCV** capable of recognizing 100+ facial samples per user.
- Achieved **95%+ recognition accuracy** through image preprocessing and Haar cascade-based feature extraction.
- Automated attendance reports exported to **CSV/Excel**, reducing manual reporting effort by 80%.
- **Technologies: Python, OpenCV**

Banking Management System (Backend API) –

- Built a **secure banking backend using Node.js, Express, and MongoDB** implementing authentication, account management, and fund transfer APIs.
- Designed a **ledger-based transaction engine** generating immutable debit/credit entries to maintain financial consistency and accurate balance tracking.
- Implemented **idempotent transaction processing, JWT authentication, token blacklisting, and balance validation** to ensure secure and reliable transaction handling.
- **Technologies: Node.js, Express.js, MongoDB, JWT, Mongoose, Nodemailer**

Certifications

- **Python** Programming – SEED IT, **July 2022**
- **MERN** Stack Development – SEED IT, **Aug 2025**

Education
B.Tech(Hons.) – Computer Science & Engineering
Chhattisgarh Swami Vivekananda Technical University | May 2024 | **CGPA: 8.2**
